

# Mave Tokenomics

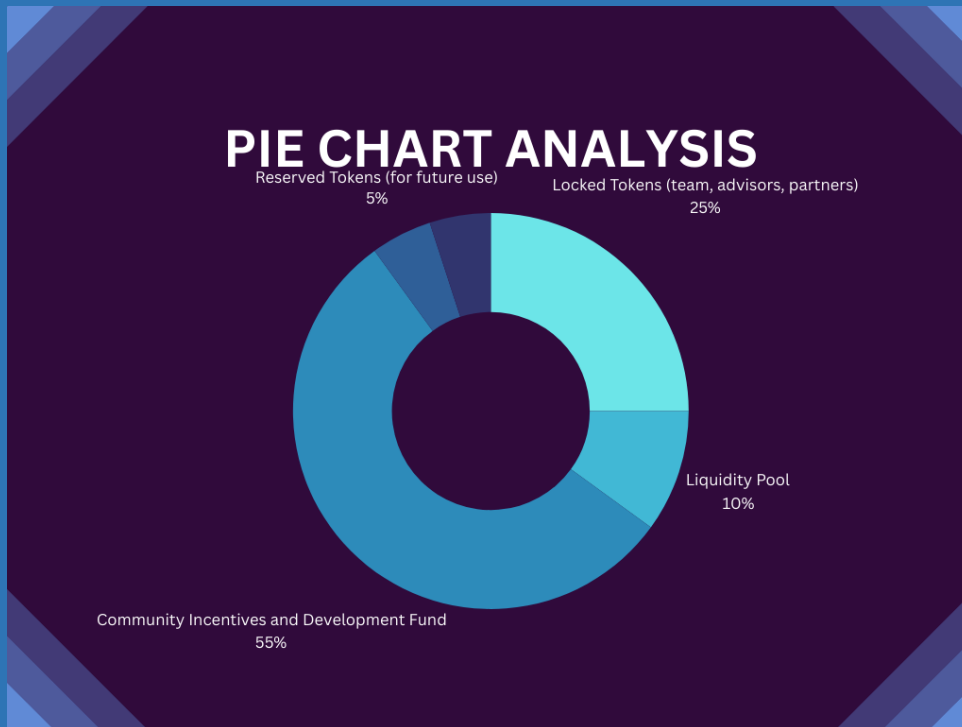

## **Introduction:**

Mave Token (MAVE) serves as the native cryptocurrency within the Memaverse ecosystem, powering transactions, governance, and incentives. Designed to foster community engagement, drive value creation, and incentivize participation, Mave Tokenomics is structured to align incentives and promote long-term sustainability within the Memaverse.

## Token Distribution:

The total supply of Mave Token is fixed at 4 billion tokens. The distribution is as follows:

1. Locked Tokens (Team, Advisors, Partners): 25%
2. Liquidity Pool: 10%
3. Community Incentives and Development Fund: 55%
4. Reserved Tokens (for future use): 5%
5. Founders: 5%

**Liquidity Pool:** The liquidity pool consists of 10% of the total token supply and is used to provide liquidity on decentralized exchanges (DEXs) for trading Mave tokens. This ensures stability and accessibility for Mave token holders.

**Locked Tokens:** 25% of the total token supply is allocated to team members, advisors, and strategic partners, subject to lock-up periods and vesting schedules. This ensures alignment of incentives and prevents token dumping.

**Community Incentives and Development Fund:** 55% of the total token supply is allocated to community incentives, ecosystem development, strategic partnerships, and future initiatives. We believe in the power of our community and want to give most of the supply to our valued members. These tokens are used to incentivize participation, reward contributions, and fund the growth of the Memaverse ecosystem.

**Reserved Tokens:** 5% of the total token supply is reserved for future use, such as ecosystem expansion, strategic partnerships, and unforeseen circumstances. These tokens provide flexibility and room for adaptation as the project evolves.

**Founders:** 5% of the total token supply is allocated to founders. This stake in the project incentivizes long-term commitment and ensures founders have a vested interest in the success of the Memaverse ecosystem.

**Integration of Other Meme Coins:** As part of our tokenomics strategy, we plan to gradually implement other meme coins into the Memaverse ecosystem. By integrating diverse meme coins, we enhance the utility and value proposition of Mave Token, allowing users to seamlessly interact with a variety of meme communities and assets. This integration will be executed thoughtfully, considering factors such as community demand, token compatibility, and ecosystem synergy.

**Token Utility:** Mave Token serves various utility functions within the Memaverse ecosystem, including governance, staking, access to premium features, rewards, and incentives. Mave holders can participate in platform governance, stake tokens to earn rewards, access exclusive content and services, and receive incentives for active participation and contributions.
